Profile

As a UX/UI designer at an HR-player tech company, I have gained more understanding of user-centered design principles and the ability to create intuitive and engaging digital experiences. My future goal is to continue honing my skills and expertise in this field, with a focus on developing innovative and user-friendly designs that drive business results. I am excited about the opportunity to bring my skills to new environment and contribute to the creation of exceptional digital experiences that delight and engage users while achieving your business objectives.

Experience

Feb 2022 - NOW

CareerLink

UX/ UI DESIGNER

- Conducted user research and analyzed feedback to inform design decisions, resulting in improved usability and user satisfaction.
- Translated user requirements into design concepts using storyboards, wireframes, and prototypes.
- Optimized existing user interface designs based on user feedback, resulting in improved engagement and conversion rates.
- Led the building and upgrading of design systems for multiple products, resulting in cohesive and consistent user experiences across the platform.
- Created multiple design versions to leverage user testing and validated design decisions with data.
- Collaborated closely with cross-functional teams, including product management, development, and leadership, to ensure the best results for users and the business.

May - Nov 2021

ITC GROUP

FRONT-END DEVELOPER INTERN

- Collaborated with a designer and development mentor to improve the UX/UI of a web application using Angular, HTML, CSS, and TypeScript.
- Implemented best practices in SASS, HTML, and TypeScript to improve code efficiency and readability, resulting in a better user experience.
- Developed strong soft skills, including teamwork, communication, team-building, and working effectively under pressure, contributing to a positive and productive team environment.
